

# **Publication Ethics and Malpractice Statement**

Ved Academic Press is committed to ensuring the highest ethical standards in all aspects of academic publishing. We adhere to the principles outlined by the Committee on Publication Ethics (COPE) and expect all participants involved in the publication process--authors, reviewers, editors, and publishers--to maintain integrity, transparency, and academic honesty.

## **1. Duties of Editors**

Editors must make publication decisions based on the manuscript's scholarly merit, originality, clarity, and relevance.

All manuscripts must be reviewed fairly, without discrimination on the basis of gender, race, ethnicity, religion, or political beliefs.

Editors must not disclose any information about a submitted manuscript to anyone other than the corresponding author, reviewers, and the publisher.

Editors are responsible for investigating allegations of misconduct and taking appropriate action, including retraction or correction if necessary.

## **2. Duties of Authors**

Authors must ensure that their work is entirely original and free from plagiarism.

All sources must be properly cited; text, data, or ideas taken from other sources must be appropriately acknowledged.

Authors should not submit the same manuscript simultaneously to more than one journal.

Authorship should be limited to those who have made a significant contribution to the research.

Authors must disclose any conflicts of interest and funding sources.

If significant errors are discovered after publication, authors must promptly notify the journal to issue a correction or retraction.

### 3. Duties of Reviewers

Reviewers must provide objective, constructive, and timely evaluations of submitted manuscripts without knowing the identity of the authors.

Reviewers must not attempt to identify the authors and must respect the confidentiality of the double-blind review process.

They must not use any unpublished material for personal benefit.

Any potential conflicts of interest must be disclosed, and if such a conflict exists, reviewers should decline the review.

Reviewers are expected to inform the editor about any ethical concerns such as plagiarism, duplicate submission, or data fabrication.

### 4. Plagiarism and Ethical Misconduct

All submitted manuscripts are checked for plagiarism using reliable tools.

Any form of plagiarism (including self-plagiarism) is strictly prohibited and will lead to rejection or retraction.

Misconduct such as data fabrication, image manipulation, or falsified authorship is unacceptable and will result in permanent blacklisting from the journal.

### 5. Data Access and Retention

Authors may be asked to provide the raw data in connection with their paper for editorial review and should be prepared to retain such data for a reasonable period after publication.

### 6. Retraction and Correction Policy

In cases of proven scientific misconduct, ethical violations, or major errors, the journal will issue a correction, retraction, or expression of concern as appropriate.

Retraction notices will clearly state the reasons for retraction and who is initiating it.

## 7. Conflict of Interest

All authors, reviewers, and editors must disclose any financial or personal relationships that could influence their work. Transparency of potential conflicts is essential to maintain public trust in the scientific process.

## 8. Copyright and Licensing

Authors retain copyright of their work but grant Ved Academic Press the right to publish and distribute the content. Unless otherwise stated, published articles are available under an open access policy.

## 9. Reporting Misconduct

Allegations of research misconduct, unethical behavior, or violations of publication ethics should be reported to the Editor-in-Chief or the editorial office via email. All allegations will be investigated confidentially and thoroughly.

Ved Academic Press strives to maintain the integrity of the academic record and build trust in the scholarly publishing ecosystem.
